Ways we can work together

These starting packages are a helpful place to begin. We can shape the scope around your goals, timeline, and budget.

BRAND & MARKETING DESIGN

Social & marketing design $80+

Need a fresh visual for your campaign? Choose up to 3 social graphics or one flyer, poster, or digital banner. Final exports and one revision are included.

Brand starter $250+

Build a consistent starting point with a logo direction, color and type palette, and two simple brand applications. Two revision rounds are included.

DIGITAL PRODUCT DESIGN

UX foundation $150+

Let's make one key journey easier to use. Includes a flow review, prioritized suggestions, and a proposed user flow or low-fidelity concept.

Product UI/UX $350+

Bring one feature to life with up to 5 screens, wireframes, polished UI, a clickable Figma prototype, and a handoff for your development team.

WHAT'S INCLUDED

- Design files and exports for agreed formats
- Clear async communication and progress updates
- Figma prototype and developer handoff for UI/UX projects

HOW PROJECTS WORK

- Scope and deliverables agreed before kickoff
- Project work billed by milestones
- Additional rounds or scope changes quoted separately

Healthcare and complex workflows
For projects involving clinical workflows, medical data, AI-assisted review, or system integrations, I'll first clarify the users, constraints, and deliverables, then provide a tailored quote.

Let's discuss your project
Share your goals, timeline, and expected deliverables to receive a scope-specific estimate.

Rates are in USD. Third-party costs, taxes, and work outside the agreed scope are not included. Larger product flows, complete brand systems, and print production are quoted after discovery.
